## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/24/07 has been entered.

Claims 20-26 and 28-30 are pending in this application. Claims 1-19 and 31-40 have been canceled. Claims 28-30 stand withdrawn being drawn to the non elected invention.

### ***Claim Rejections - 35 USC § 103***

2. Claims 20-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over combined teachings of Moran et al and Patton(US 5,607,915).

Instant claims are drawn to the pharmaceutical composition of claim 20, a buffering agent and water, wherein buffering agent can be citrate and also includes isotonic solution.

Moran et al teach pharmaceutical composition of compound whose structure is same as claimed herein, see Fig 15, compound 72. Note column 19, lines 49-50, wherein citric acid is expressly taught, and column 110, line 60, wherein water is expressly taught. The difference between the reference and herein claimed composition is that isotonic solution is not taught.

Patton is teaching a pharmaceutical composition for nabulizer, wherein it is expressly taught that sodium chloride can be added to the composition, see column 5, line 55 and lines 62-66.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to modify Moran et al, by including sodium chloride in the composition, because the latter reference is expressly teaching the addition of sodium chloride in the pharmaceutical composition of nabulizer.
